The 220 and 330 engines used the CAV DPA rotary distributor pump and the timing spline on the pump has a master spline and groove arrangement so you cannot get the pump in wrong. The 300 diesel used an inline pump on some engines.

### Old Marine Engine: Bedford Marine engine

Marine diesel engines differ from automobile engines in two key respects. Firstly, they typically experience much higher loads, so they have to work a lot harder when they're providing propulsion. Secondly, most older boats use a water-circulating pump rather than a contained cooling system. These two facts have direct implications on the types ...
