#### Lab Answer Key

Human Genome The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic solutions to these disorders.

### Chapter 14 Mendel and the Gene Idea Lecture

#### Outline . Overview:

Drawing from the Deck of Genes. Every day we observe heritable variations (such as brown, green, or blue eyes) among individuals in a population. These traits are transmitted from parents to offspring.

One possible explanation for heredity is a “blending” hypothesis.
