power consuming type magnetic core memory, wired-in arithmetic and logical functions (gate logics); mostly done to improve the speed of operation..

## **Introduction to Computer Based Control Systems**

A CNC machine is a motorized maneuverable tool and often a motorized maneuverable platform, which are both controlled by a computer, according to specific input instructions. Instructions are delivered to a CNC machine in the form of a sequential program of machine control instructions such as G-code and M-code, then executed.

## Processes by John G ...

Automation and control of processing equipment by highly sophisticated computer control systems is the standard at process facilities. Automatic control provides for closer control of the preprocess conditions and therefore increased efficiencies. Increased efficiencies allow higher production outputs.
